## Esthetic and Function – The Perfect Combination

October 14/15, 2005 – Congress and Workshop in Tallinn/Estonia

May things have changed over the past years in implant dentistry. To include: new products and study results, new techniques and developments in clinical research and new treatment concepts. One important factor however has never changed and that is: "Patient Satisfaction".

At the same time, the clinician requires economical and safe products that are easy to handle and offer long-term success. Esthetics and function are important for success and so is a good partnership between the distributor and manufacturer.

The SynCone® concept and the new CERCON® technology are some of the topics we would like to present to you during our congress and workshop. Dr. Koray Feran from England, Dr. Alon Rass from Estonia and Dr. Jan Kielhorn from Germany will present to you in detail, during these two days, the possibilities of SIROWA and FRIADENT® products.

Congress on the 14<sup>th</sup> of October 2005 beginning at 2.00 p.m.:

- **Dr. Jan Kielhorn:** "Breaking the ice with XiVE® – new protocols in implant dentistry and superstructures"
- **Dr. Alon Rass:** "Optimum esthetics with optimum means"
- **Dr. Koray Feran:** "The ANKYLOS® implant system and a new treatment concept with SynCone®"

Workshop on the 15<sup>th</sup> of October 2005 beginning at 11.00 a.m.:

Jan Kielhorn: FRIALIT®/XiVE® prosthetic components with hands-on training

**Join us for this event in Tallinn!**

With Best Regards

Your SIROWA Team
